Art Unit: 1711

1. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Within claim 6, the reference to the "emulsion of the rubber solution and water" fails to further limit claim 5. Claim 5 does not allow for this permutation.

2. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Firstly, it is unclear if water is optional or if the "large excess" is the optional feature. It is noted that "optionally" appears after water.

Secondly, the word "large" is relative terminology. It is unclear what quantity of water is set forth by the language.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to

Art Unit: 1711

the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 12-265007.

The reference discloses the addition of thermoplastic elastomers and short fibers to rubbers, so as to obtain rubber compositions having excellent processability and improved physical properties. The reference further discloses short fiber sizes that meet those of applicants' claims and further disclose that the short fiber may be polyurea, though other suitable species are disclosed, as well. See abstract. The position is taken that it would have been obvious to incorporate the disclosed short fibers, including those of polyurea, into a rubber composition, so as to obtain a rubber composition having the aforementioned improved characteristics. Applicants' claim language does not differentiate the disclosed short fibers from the claimed particles.

5. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.
